

Plays Me

By Scott Watts

Why make the world so fast
And vast
So passed
And so cast
And half-assed
But too small

And then just teach us how
To bow down
And buy now
Because wow
Wholly cow
We just down it all

But I don't play the game
The game it just plays me
I just sweat and save
Will someone please save me?
Living under cover
And the game it just plays me
It just plays me

Why tell your children lies
And advise
Shallow highs
And shiny size
Before they flash

And then just play the clown
When they drown
In your sound
Taken down
Under pound
You just ground 'em all

And I can't play the game
The game it just plays me
I just sweat and save
Will someone please save me?
Living under cover

And the game it just plays me
It just plays me

And you're bright
To think you're all alone

Just running for the height
That you were told was home

And that's our fight
It spins through spite
Just remember what you need

And I can't play the game
The game it just plays me
I just sweat and save
Will someone please save me?
Living under cover
And the game it just plays me
It just plays me
It just plays me
